1. ADMISSION MANAGEMENT

1. Key Sub-Modules

Online Registration | Entrance/Management Quota | Document Verification | Fee Payment | Seat Allotment | Student ID Generation | Department Allocation

2. Operational Features

- Interactive student portal with validation checks.
- Rank merit list calculations and fee status verification.
- Automatic student profile and institutional ID card initialization.

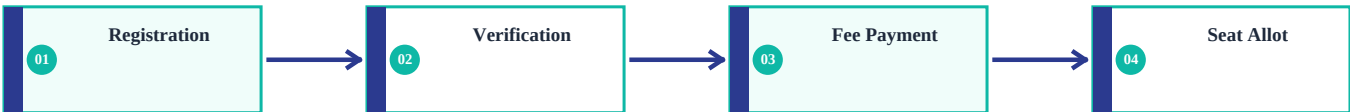

3. Working Process Flow

Prospects register online. The system checks cutoffs, schedules document verification slots, records quota allocations, and locks seats upon fee transaction confirmation. Finally, it allocates department branches and releases roll numbers.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Admins	Complete control. Modify fee status, override quota, edit document verify rules.
Principal / Dean	Approve final seat allocation, check merit logs and intake stats.
Student / Guest	Fill application forms, upload verification files, pay fees, download receipts.

5. System Operational Workflow Flowchart

2. STUDENT INFORMATION SYSTEM (SIS)

1. Key Sub-Modules

Student Profile | Academic History | Certificates | Parent Details | ID Cards | Alumni Records

2. Operational Features

- Central 360-degree digital card for every registered student.
- Automated certificate generation (Bonafide, Transfer, Course Completion).
- Continuous tracking transitioning to alumni database on graduation.

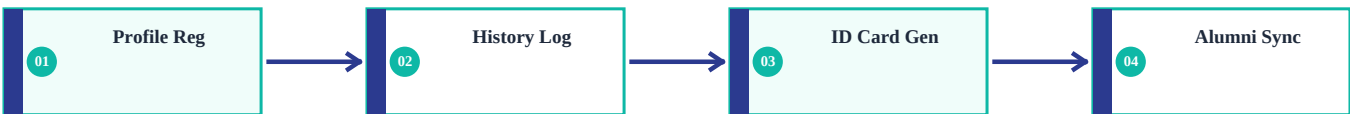

3. Working Process Flow

Students input details and upload files. System formats ID cards, links course completion records, logs discipline logs, and manages parent contacts. Upon graduation, accounts transfer into the alumni directory automatically.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Admins	Full read/write rights. Manage certificate formats and disciplinary records.
HOD / Faculty	View student profile dashboards, check academic progress and parent details.
Student / Parents	Read-only access to personal profiles and grade cards. Update address logs.

5. System Operational Workflow Flowchart

3. ACADEMIC MANAGEMENT

1. Key Sub-Modules

Academic Calendar | Semester Creation | Course Registration | Curriculum (R20/R23 etc.) | Credit System | Electives | Timetable

2. Operational Features

- Configurable curriculum regulations (Choice Based Credit System - CBCS).
- Automatic elective courses allocation based on student preference and merit.
- Clash-free timetabling engines mapping classrooms and faculty availability.

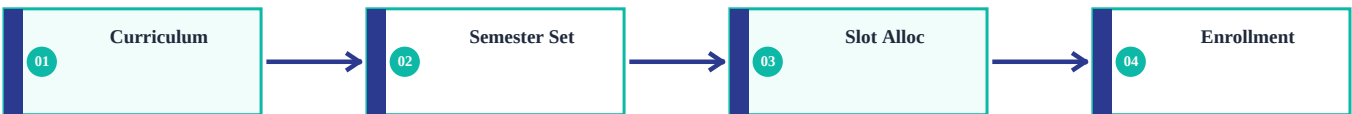

3. Working Process Flow

Deans create semesters and define course codes under specific regulations (e.g. R23). Faculty input lecture availability. System builds visual calendar timetables. Students login to select electives and register courses.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Deans	Create semesters, regulations, map core timetables and publish calendar books.
HOD / Faculty	Add syllabus, verify curriculum files, manage course mappings.
Student	Select open electives and complete course registrations.

5. System Operational Workflow Flowchart

4. ATTENDANCE

1. Key Sub-Modules

Faculty Attendance Entry | Student Attendance | Biometric/RFID Integration | Shortage Calculation | Parent SMS | Reports

2. Operational Features

- Biometric device integration pulling punch logs in real time.
- Automated attendance shortage reports tracking minimum 75% thresholds.
- SMS triggers dispatching daily warnings to parents for absent students.

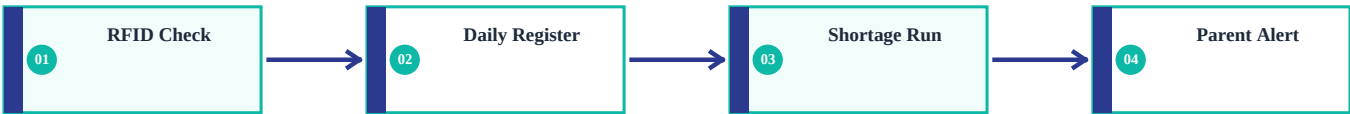

3. Working Process Flow

Biometric devices log check-ins. Faculty verify records manually or override errors. The shortage calculator computes compliance scores weekly and schedules SMS alerts. HODs export report indices.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Admin	Configure biometric ports, clear buffer errors, override shortage lists.
HOD / Faculty	Submit daily class attendance sheets, review department percentages.
Student / Parent	Read-only check-in calendar logs and warning notifications.

5. System Operational Workflow Flowchart

5. EXAMINATION

1. Key Sub-Modules

Exam Schedule | Hall Ticket Clearance | Question Paper Encryption | Exam Centers | Invigilator Roster | Seating Matrix | Exam Attendance | Internal & External Marks | SGPA/CGPA Result Processing | Revaluation | Grace Marks Sanction | Malpractice Board | COE Reports

2. Operational Features

- Dedicated Controller of Examinations (COE) Governance Suite with outcome-based SGPA/CGPA computation.
- Automated Hall Ticket clearance and withhold controls for fee defaulters or low attendance (<65%).
- AES-256 Question Paper encryption, invigilation duty rosters, and anti-malpractice seating matrix.
- Board moderation, revaluation grade updates, grace marks (+1/+2) sanctioning, and malpractice verdicts.

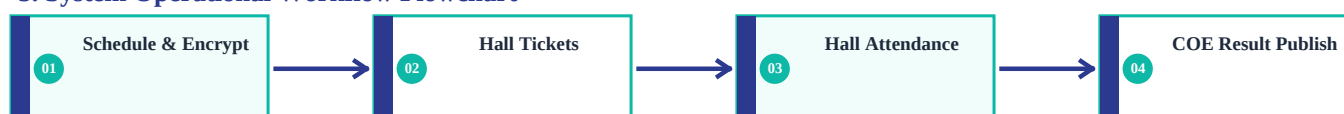

3. Working Process Flow

Exam branch creates schedules and allocates centers. Candidates screen for attendance/fee clearance to unlock hall tickets. Question papers undergo AES-256 encryption. Hall invigilators track live attendance. Internal and external marks are moderated, results process to SGPA/CGPA, and transcripts auto-generate alongside revaluation and grace mark sanctions.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Controller of Examinations (COE) / Dean	Complete administrative authority: Approve results, sanction grace marks, execute malpractice verdicts, lock encrypted question papers.
HOD / Faculty	Upload internal marks, confirm invigilation duties, verify moderation keys.
Student	Register for exams, download hall tickets, view SGPA/CGPA results, apply for revaluation.

5. System Operational Workflow Flowchart

6. FACULTY ERP

1. Key Sub-Modules

Faculty Profile | Workload | Leave | Attendance | Research | Publications | Performance | Payroll

2. Operational Features

- Workload manager tracking weekly lecture schedules against guidelines.
- Research and publication log tracking research citations.
- Self-appraisal sheets linked directly to NAAC files.

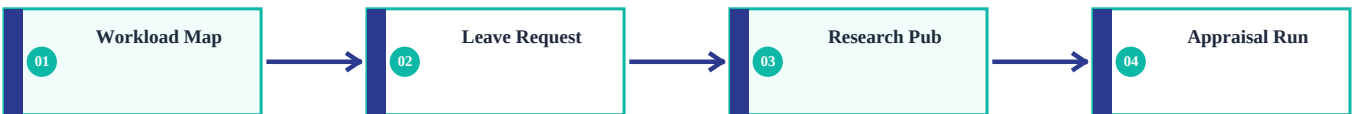

3. Working Process Flow

Faculty edit profiles, upload research papers, apply for leaves, and track weekly lecture workload. System computes performance scores based on publications and feedback, updating payroll allowance indices.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Admin	Approve promotions, modify payroll bands, adjust teaching limits.
HOD / Dean	Review faculty workloads, approve research funds, sign leaves.
Faculty	Manage personal profiles, leaves, research logs, and check salary slips.

5. System Operational Workflow Flowchart

7. LEARNING MANAGEMENT

1. Key Sub-Modules

Notes | Videos | Assignments | Quizzes | Discussion Forum | Online Classes

2. Operational Features

- Direct file uploads (PDF, MP4, Docs) for study material.
- Online assignment submissions with plagiarism detection cues.
- Online quiz modules with automatic grading keys.

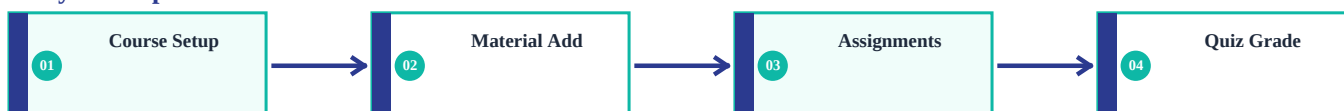

3. Working Process Flow

Faculty create course pages and post notes, files, and video links. Quizzes are published with timers. Students submit assignments. Discussion forums allow thread queries. Grades sync to the LMS database.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
HOD / Faculty	Upload study material, manage quizzes, grade submissions, run online links.
Student	Download notes, watch videos, submit assignments, attempt quizzes.

5. System Operational Workflow Flowchart

8. PLACEMENT CELL

1. Key Sub-Modules

Student Eligibility | Company Registration | Job Posting | Applications | Aptitude Tests | Interview Schedule | Offer Letters | Placement Statistics

2. Operational Features

- Eligibility criteria filters (CGPA, backlogs limits).
- Recruiter dashboard to post vacancies and download applicant profiles.
- Placement analytics tracking average and highest package values.

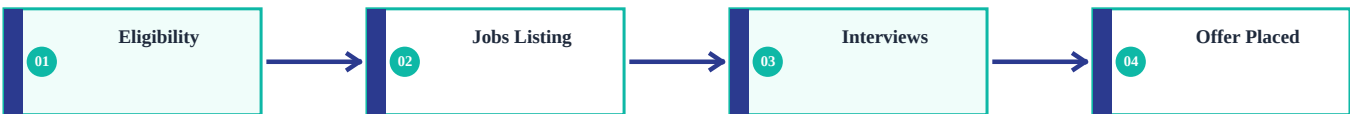

3. Working Process Flow

Placement officer registers companies. Recruiters upload jobs. Eligible students register. System arranges aptitude exams and interview panels. Offers are logged, updating placement dashboard statistics.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Placement Officer (TPO)	Add corporate profiles, review applications, set CGPA thresholds, upload offers.
Recruiter	Post vacancies, filter resumes, update hiring status.
Student	View jobs, check eligibility status, apply, and download mock tests.

5. System Operational Workflow Flowchart

9. HOSTEL

1. Key Sub-Modules

Room Allocation | Attendance | Hostel Fees | Visitor Log | Complaints

2. Operational Features

- Live bed matrix displaying vacant, occupied, and maintenance room layouts.
- Outing gate logs and night check-in attendance registries.
- Complaints ticket portal routing issues to wardens.

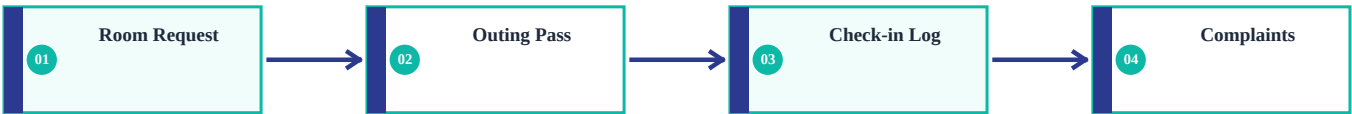

3. Working Process Flow

Students apply for rooms. System checks fees and assigns beds. Wardens take night attendance via mobile keys. Security logs visitors. Mess systems track student feedbacks.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Hostel Warden	Allocate rooms, verify night check-ins, resolve maintenance complaints.
Accounts Manager	Post hostel fees and track pending payments.
Student Resident	Apply for rooms, submit gatepasses, register complaints, log dining feedbacks.

5. System Operational Workflow Flowchart

10. TRANSPORT

1. Key Sub-Modules

Route Management | Bus Allocation | GPS Tracking | Driver Details | Fee Collection

2. Operational Features

- Route mapper tracking stops and bus seating capacities.
- GPS location integration for live bus coordinates.
- Fee collection registers linked to student entry passes.

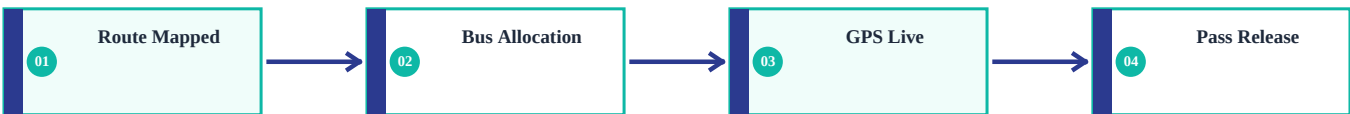

3. Working Process Flow

Transport in-charge defines routes and stops. Buses are allocated. Drivers register. Students opt for routes, pay fees, and get boarding cards. GPS devices feed coordinates to the student dashboard.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Transport Officer	Define routes, schedule maintenance, allocate drivers, track routes.
Accounts Cell	Manage fee logs and bus pass issue lists.
Student / Parent	Read-only access to route schedules, bus locations, and fee status.

5. System Operational Workflow Flowchart

11. LIBRARY

1. Key Sub-Modules

Book Catalog | Issue/Return | Fine | Digital Library | Barcode/RFID

2. Operational Features

- OPAC Search index for physical book titles and journals.
- RFID/Barcode tracking scanning book issuance and returns.
- Automated library fine calculations linked to fee books.

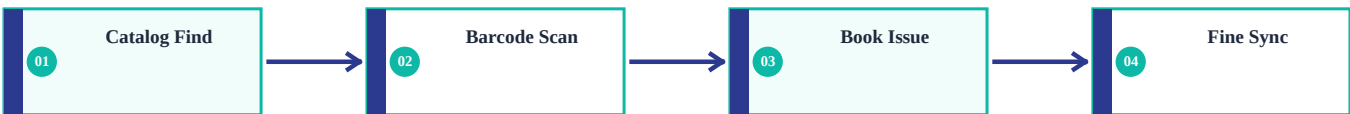

3. Working Process Flow

Librarian scans book barcodes. System logs check-out limits and return periods. Reminders are dispatched for overdue items. Fine calculations are linked to student accounts automatically.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Librarian	Manage catalog, scan barcodes, override fines, issue digital books.
Student / Faculty	Search catalog, view checkout history, read e-books, pay outstanding fines.

5. System Operational Workflow Flowchart

12. FINANCE

1. Key Sub-Modules

Tuition Fees | Scholarships | Payroll | Vendor Payments | GST Reports | Accounting

2. Operational Features

- Tuition fee ledger tracking dues, installment plans, and online gateways.
- Scholarship adjustment registers and government scheme mappings.
- TDS, GST, and balance sheet generators.

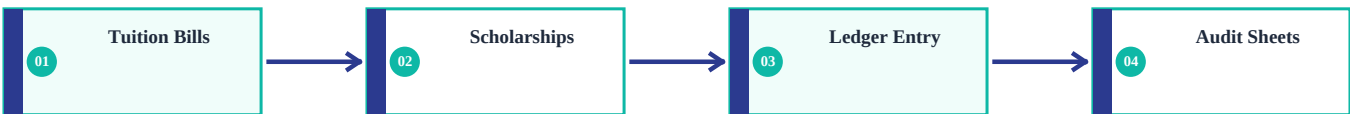

3. Working Process Flow

Finance team logs fees, checks scholarship allocations, dispatches vendor payments, and runs payroll accounts. GST records and balance sheets are compiled automatically for annual audit reporting.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Finance Head	Full financial control, ledger edits, balance sheets, bank reconciliations.
Accounts Team	Process tuition fees, verify scholarships, release vendor bills.
Student / Parent	View fee balances, pay online, download receipts.

5. System Operational Workflow Flowchart

13. HRMS

1. Key Sub-Modules

Employee Records | Recruitment | Attendance | Leave | Payroll | Performance

2. Operational Features

- Staff directory with reactive details.
- Leave management board and biometric sync controllers.
- Locked payroll disbursement keys.

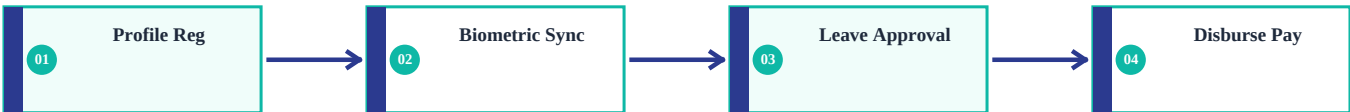

3. Working Process Flow

Admin manages personnel records. Department heads sync RFID devices and approve leaves. System calculates basic scales, allowance, and releases salaries. Appraisals track research files for NAAC audits.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Admins	Manage records, post openings, approve leaves, release payroll.
Accounts Manager	Disburse salary scales, edit allowances.
HOD / Faculty	Approve leaves, sync attendance, view performance ratings.

5. System Operational Workflow Flowchart

14. INVENTORY

1. Key Sub-Modules

Assets | Lab Equipment | Purchase Orders | Stock | Maintenance

2. Operational Features

- Book Value and WDV calculations with depreciation rates.
- Stock consumable indicators warning on low volumes.
- Outward gatepass log with security return checks.

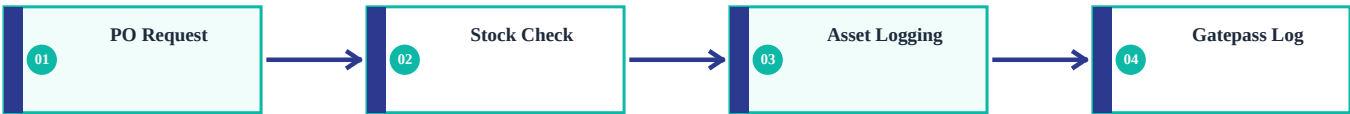

3. Working Process Flow

Asset register audits initial values vs. depreciation values. Custodians log lab equipment states. Purchase requests are authorized. Stock levels auto-adjust. Gate passes track devices sent out for repair.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Admin	Full asset ledger access, PO approvals, gatepass issuing.
Accounts	Verify PO budgets, balance asset books, restock consumables.
HOD / Lab Custodian	Mark equipment serviced, request gatepasses.

5. System Operational Workflow Flowchart

15. ACCREDITATION

1. Key Sub-Modules

NBA | NAAC | AICTE | NIRF | AISHE Reports | Event Management | Certificate Management | Evidence Repository

2. Operational Features

- NBA CO-PO mapping and attainment | NAAC SSR criteria-wise evidence.
- AICTE EOA records, NIRF data, and AISHE DCF filing compliance.
- Event proposal workflow, attendee check-in, and auto-certificates.
- Digital signed certificate downloads and central evidence repositories.

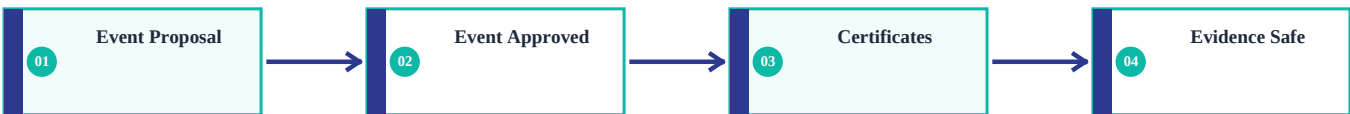

3. Working Process Flow

Faculty/HOD creates an event proposal. The HOD and Principal review and approve it. The event is published for student registration, attendance is verified, and the coordinator uploads the reports and documents. The system then automatically generates participation/organizer certificates and stores event evidence for accreditation criteria.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin	Manage accreditation modules, approve reports, manage certificates, view analytics.
Principal / Dean	Approve events, verify accreditation reports, approve final submissions, monitor progress.
HOD	Create/approve event proposals, upload department evidence, validate reports.
Faculty / Coordinator	Organize events, mark attendance, upload reports, generate certificates.
Student	Register for events, view approvals, download certificates, track participation history.

5. System Operational Workflow Flowchart

16. COMMUNICATION

1. Key Sub-Modules

SMS | Email | Push Notifications | Circulars | WhatsApp

2. Operational Features

- Multi-channel broadcast engine routing alerts via SMS, Email, and WhatsApp.
- Circular archive for official notices.
- Automated triggers for announcements, fee dues, and exam updates.

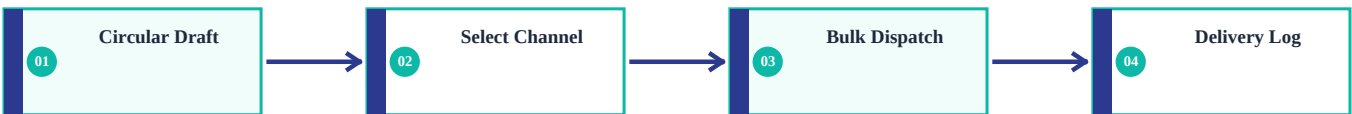

3. Working Process Flow

Authorized staff select channels and enter messages. The communication dispatcher sends bulk messages. Push notifications appear on mobile devices, and official circulars publish to dashboards.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin / Admins	Send global notifications, upload public circulars.
HOD / Faculty	Message department students, issue class circulars.
Student / Parents	Read-only notifications inbox.

5. System Operational Workflow Flowchart

17. GRIEVANCE

1. Key Sub-Modules

Complaints | Anti-Ragging | Women Cell | Resolution Tracking

2. Operational Features

- Anonymous grievance submission portals for security.
- Legal compliance trackers for Anti-Ragging and Women Cell cases.
- Resolution tickets routing incidents to designated review boards.

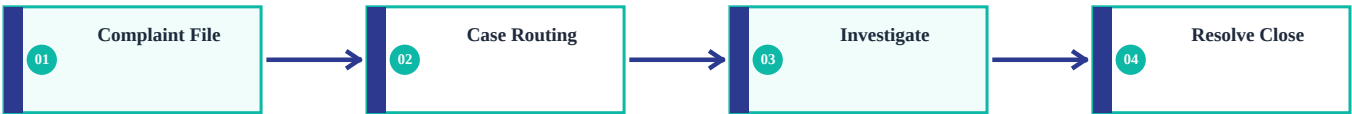

3. Working Process Flow

Grievances are registered. The system assigns a case number and notifications are sent to the review board. Investigation logs are filed, and status shifts to Resolved after review.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Grievance Committee	View reports, assign investigators, record resolution logs.
Super Admin	Oversee case statistics and check compliance.
Student / Faculty	Submit complaints, track ticket status anonymously.

5. System Operational Workflow Flowchart

18. ALUMNI

1. Key Sub-Modules

Alumni Registration | Donations | Events | Mentorship

2. Operational Features

- Verified alumni registry matching student graduation records.
- Secure donation gateways with tax benefit receipts.
- Mentorship network pairing alumni with current students.

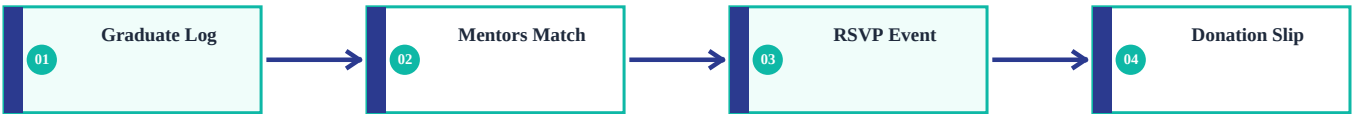

3. Working Process Flow

Graduating students transfer to the alumni directory. Alumni update details, RSVP to events, select mentorship tracks, and process donations. System generates 80G tax benefit certificates.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Alumni Officer / Admin	Verify registry profiles, coordinate events, monitor donations.
Alumni	Manage profile details, process contributions, offer mentorship slots.
Student	Request mentorship matches, view alumni networks.

5. System Operational Workflow Flowchart

19. ADMINISTRATION

1. Key Sub-Modules

User Roles | Permissions | Audit Logs | Backup | Reports | Analytics Dashboard

2. Operational Features

- Granular role permissions configuration tool.
- Immutable audit logs detailing every user action.
- System database backup schedules.

3. Working Process Flow

Super admins use the dashboard to map user credentials to roles. The system records all API calls in an immutable audit log. Automated cron-jobs run database backups nightly.

4. Role-Based Access Controls (RBAC)

Authorized Role	Access Scope & Permissions Matrix
Super Admin	Manage system configurations, edit permissions, view audit logs, schedule backups.
Auditors / Deans	View logs and export analytics report files.

5. System Operational Workflow Flowchart
